DETAILED ACTION

Allowance

1. Claims 1, 2, 4-9, 26, and 33-36 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The instant invention is directed toward a system for providing services from a server to a terminal device. A plurality of storage media are recorded with a unique identifier and access right information. The access right information comprising an upload authorization bit and a download authorization bit. A database is used to manage the unique identifiers. At the terminal, a medium is read for its unique identifier and checked against the database. Based on the unique identifier and the access right information, the server offers services to the user at the terminal.
4. It is noted that the upload authorization bit and the download authorization bit are values that can be one of two values. In a way, they act like a flag or Boolean value. This is further evidenced by claim 36. The prior art does not disclose the recording of a unique identifier and this type of access right information on a storage medium, the database for managing the identifiers, and the terminal for processing the medium to offer services. This combination of features is also not obvious in view of the prior art.
5. The closest prior art are as follows:
6. Collart et al. (US Patent 6,405,203) discloses a system for tracking the distribution of content electronically. Storage mediums have a tracking identifier which is used to determine how content is distributed (i.e., offering services). Collart, however, does not disclose also recording upon the medium access right information like the instant invention.

7. Akiyama et al. (US Patent 5,805,699) discloses a software copying system that allows copying from a master to a target storage medium in a legitimate manner. In doing so, the system utilizes an identifier to determine if a user has access rights to make the copy. Unlike the instant invention, Akiyama does not disclose access right information comprising two bits, one for upload and one for download.
8. Sako et al. (US Patent 6,134,201) discloses a data recording apparatus capable of preventing easy copying of information. Alone or in combination with Collart or Akiyama, Sako does not disclose the features of the instant invention.
9. For at least these reasons, claims 1, 2, 4-9, 26, and 33-36 are allowed.
10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
